

FOR LEASE

OPPORTUNITY FOR FINANCIAL INSTITUTION IN DAYBORO

Expressions of interest are invited to lease the former offices of a leading credit union located in the centre of the Dayboro retail precinct. With the departure of the credit union from this location there is now a significant gap in this growing township for a financial institution and this space is ready made for your next branch.

Priced to lease with the emphasis being for the service of the local community, this space with country charm fronting the main road, includes the following:

- Approximately 62m² in size
- Full security counter with two tellers windows
- Private work area
- Separate kitchen area
- Large built in walk in safe
- Air conditioned

Northpine Christian College students show off the results of The Eden Project.

Cultivating life skills

INSPIRED by a key Bible story, Northpine Christian College Year 7-8 Challenge students have built their own successful veggie garden.

The Eden Project students were recently able to harvest lettuce, two varieties of spinach and tat soi from the garden in which they have spent the past few months preparing, building and tending.

Northpine's Maintenance Department constructed

the garden bed frames, and Year 7 teacher Gary Greenland designed and installed the automated watering system.

The project has been aided by the Federal Government's \$5000 Agriculture in Schools grant.

"We're running the garden on permacultural principles," program leader Claudia Houstoun said.

"This means no chemicals, composting our plant waste to make our own fer-

tiliser, harvesting our own seeds, encouraging friendly insects and paying proper attention to natural cycles to grow the most nutritious, eco-friendly food possible."

"Study after study shows us that the more time we spend in nature, the higher our wellbeing. So, not only are the students developing a valuable life skill, they're de-stressing."

The Eden Project plans to eventually have vegetables for sale once a week.
